October 8, 1991

Cherryl F. Barnett  
Department of the Navy  
Naval Station  
Attn: Code N-4, Environmental Programs  
Norfolk, Virginia 23511-6000

Dear Ms. Barnett:

This letter is to confirm my telephonic request to you on September 27, 1991, for information regarding the Camp Allen landfill environmental investigation. Specifically, I requested any information and data that the Navy has received pertaining to ground water flow directions and quality in the study area. This data would probably include the 1988 engineering report on the dump, and data or reports generated by your consultant, CH2M Hill, resulting from their 1991 studies at this site. You responded that your consultant would probably be able to provide information by the following week. To date, we have not received any further communication regarding this request.

This information will help our Agency evaluate potential for ground water impacts to the Glenwood Park residential area of Norfolk. Any assistance you can provide that will help us perform a timely review of the ground water contamination situation in this area will be greatly appreciated.

If you have questions, please call me at (804) 552-1840.

Sincerely,

David E. Barton

David E. Borton  
Ground Water Manager
